Cael O'Connor

Boston, MA | caelmoconnor@gmail.com | 617-676-8277 | LinkedIn | Portfolio | GitHub

EDUCATION

Stonehill College | Easton, MA — Graduation: May 2026
Bachelor of Science
Major: Computer Science | **Minor:** Criminology | **GPA:** 3.53

RELEVANT WORK EXPERIENCE

Trek10 | South Bend, Indiana — June 2025-July 2025
Cloud Engineer Intern

- Built an in-house replacement for AWS Fleet Hub containing backend services in TypeScript and RESTful API endpoints with Flask for real-time monitoring and fleet management of 100+ IoT devices
- Wrote infrastructure as code across Lambda, DynamoDB, Cognito, and Greengrass to support device provisioning and monitoring
- Collaborated on API design and cloud architecture, applying AWS, Git, and software engineering best practices

ADDITIONAL WORK EXPERIENCE

Roche Brothers Supermarkets | Boston, MA — June 2021-Present
Head Cashier

- Oversee store opening, closing, and shift-change actions while managing a front-end team

PROJECTS

Computer Science Capstone | Stonehill College — February 2026-April 2026
Qualitative Coding Website

- Developed a full-stack web app (React, Python/Django, PostgreSQL) enabling faculty and students to tag and analyze qualitative research documents, designing backend logic and REST API endpoints
- Containerized and deployed the app to a DigitalOcean server via Docker, managing the codebase with Git
- Led the database team and collaborated with other teams to meet sprint deadlines

Independent Project — May 2026-July 2026
Anime Ratings Website

- Designed and built a RESTful API (Node.js/Express, PostgreSQL, Redis) powering a full-stack anime rating platform (React/Vite) with watchlists, reviews, and comments
- Implemented JWT auth with instant revocation, rate limiting, and least-privilege DB roles
- Configured a CI/CD pipeline running the full test suite before every deploy and containerized the app with Docker for a DigitalOcean server behind Nginx with TLS

LEADERSHIP EXPERIENCE

Association for Computing Machinery | Stonehill College — May 2025-May 2026
Club Co-President

- Led bi-weekly chapter meetings on technical topics and career development
- Coordinated and hosted guest speaker events with industry professionals and alumni

SKILLS

Programming Languages: Proficient: Python, Java, JavaScript, TypeScript, HTML, CSS, SQL. **Familiar**: C, C++, R
Frameworks and Libraries: React, Django, Flask, Node.js, Express
Other Skills: AWS, Docker, Git, PostgreSQL, Redis, DigitalOcean, Nginx, Vega
